                "Summary" section - Change "**Scan Template**" to "**Scan Job Template**" to be consistent
                with Terminology. This applies to both this document and the Model and Interface
                document.

8   197   Add new definition "**ADF**".

                Synchronize the definition of "Attribute" with the Model and Interface document.

                Typo in the definition of "**Default Scan Job Ticket**" – "Ticekt" => "Ticket".
                Change green text to black.

                Add new definition "**Element**" because it's used in some other definitions.

                Delete "in" in the definition of **Hardcopy Document** – "…and stored in at the Scan
                Destination…". This applies to both this document and the Model and Interface document.

                Add new definition "**Job History**" to synchronize with the Model and Interface document.

9   In the definition of "**Physical Scan Document Ticket**", change "A encoded…" to "An
                encoded…".

                Change the definition of "**Scan Document Ticket**" from: "A data object that contains
                document processing…" to "A data object that contains an end user's Scan Intent for
                document processing and descriptive properties of a Scan Document of a Scan Job. …".
                This applies to both this document and the Model and Interface document.

                Change the definition of "**Scan Intent**" from: "The end user's preference for the processing
                and description properties of a Scan Job" to "The end user's preference for the processing
                and description properties of a Scan Job or Scan Document".
                This applies to both this document and the Model and Interface document.

                Change the definition of "**Scan Job Ticket**" from "A data object that contains document
                processing …" to "A data object that contains an end user's Scan Intent for document
                processing…". This applies to both this document and the Model and Interface document.

                Typo in "**Scan Job Ticket**": "JScan Job" => "Scan Job".

                Change the definition of "**Scan Job Template**" from "A Scan Job Ticket data object that is
                not bound to a Scan Job" to "A Scan Job Ticket data object representing an end user's
                preconfigured Scan Intent that is not bound to a Scan Job". This applies to both this
                document and the Model and Interface document.

Delete one extra "." At the end of the 2nd sentence of "**Scan Service**" definition.

Synchronize the definition of "**Template Manager Service**" with the Model and Interface document.

Delete "Scan" from "Scan Job Template" in the definition of "**Template Repository**". A Template Repository is not scan specific. This applies to both this document and the Model and Interface document.

Synchronize the definition of "**Template Repository**" to be consistent with that in the Model and Interface document.

13	244	The 1st occurrence of "attribute" should be plural.
15	352	In Figure 2 for use case 2, the Step (5) of the flow graph needs to be corrected with arrow From User to local network scanning client application.
16	405	"Remote Scan Client" should be "remote network scanning client".
18	453	Delete one extra "Physical" in "Physical Physical Scan Document Ticket".
19	top	Figure 4 Walk-up Batch Scan, minor adjustment to straighten the arrowed lines.
25	656	The sentence does not parse right. Change it to "…administered to permit the Scan Service to write an end user's Scan Document Data to their specified repository …successfully authenticated…".
25	664	The sentence does not parse right at the end. Change "of effective signing or encryption of each end user's keys" to "each end user's effective signing or encryption key."
26	675	Change "used" to "supported".
